

AQUA BARRIER

Temporary Water Inflated Dams

Innovative Environmental Solutions

NOW AVAILABLE FOR LEASE

Aqua Barriers are engineered, temporary cofferdams made from flexible PVC vinyl. They have internal patented baffles for safety and stability on site. Aqua Barriers come complete with fill ports, drain ports and pipe loops, and can be rapidly deployed. When removed they leave no environmental footprint unlike earthen bunds and sheet piling. Aqua Barriers are available in a variety of heights and lengths to suit individual project needs and can be overlapped to form continuous structures. They are re-usable and roll up compactly for easy storage and transportation.

Typical Applications: -

**Bridge & Culvert Repairs * Boat Ramps & Jetties * Pipe Crossings * Wetland Rehabilitation *
River Wall Works * Weir & Dam Maintenance * Shoreline Restoration**
